

Community Nursery

OUR NURSERY AIMS

Intent

At Manchester Settlement nursery we are passionate about supporting each and every child to have the best possible start to their educational and personal development journey.

Implementation

We achieve this through our nurturing relationships and inspirational early years pedagogy. Pedagogy is our teaching and learning model its' how we teach, the methods we use and our approaches to learning.

We have **3 elements** to our pedagogy that are of equal importance in supporting children's all around development and wellbeing.

1 Nurturing relationships

We understand that trusting relationships are key for children and their social and emotional development, we work together with children, parents, and our community partners to nurture and support children's development.

2 Holistic curriculum

We embrace the EYFS, and place equal importance on the educational and moral development of children and their health and wellbeing. We teach through play using a mix of high quality teacher led activities and interactions, child initiated play and personalised learning.

3 Healthy lifestyles

We recognise the importance of good physical and mental health for children's wellbeing we promote healthy eating, physical activity, and emotional development through our curriculum and community health partnerships.

We extend and embed children's learning through parent partnerships and home learning, providing activities at home.

Our environments are planned to meet the needs and interests of children and to develop their curiosity and awe and wonder of the world around them. We use provocations, visits from parents and community members and visits into the local community.

Impact

Children are confident, motivated learners. They have progressed from their starting points and are eager and well prepared to move to their next stage of learning.
